Cutting Tips

- a. When heavy cutting is involved, place one handle of the tool on the ground using foot pressure. This allows more power to be transferred to the cutting edges, and permits the cutting force to be applied to the upper handle.
- Use the correct cutting tool for the type, size, and hardness of the metal to be cut. Failure to do so can result in product damage or injury.
- c. Keep cutter jaws at right angles to piece being cut. Cutting diagonally may twist jaws and damage head.
- d. Do not twist or pry with tool while cutting.
- e. Do not exceed the full cut on a material whose hardness is unknown. Test hardness with slow pressure to see if material surface is being cut. The size of the metal you are cutting is not as important as material hardness.
- f. Do not exceed the cutter capacity that is marked on the jaw of the tool or its rating capacity in this catalog.
- g. Keep jaw bolts tight and joints oiled at all times. Inspect tool frequently for damage and replace wo mparts.
- h. Maintain the original jaw bevel angles when sharpening out of line or chip cutting edges.

Safety Do's and Dont's

Wear your gloves and safety glasses at all times!

Do wear safety shoes.

Do remove oil or grease from your hands, from tools and from the floor and area where you will be working.

Do remember that metal can fly when cut. The harder the metal, the farther it will fly, and possibly cause injury.

Do warn those in the area when you intend to use a cutter and protect others.

Do use all tools as recommended.

Don't attempt to use a cutting, hand or power tool, until you fully understand its use.

Don't forget that metal fragments may fly and cause injury.

Don't use cutters for any application except those listed in this catalog.

Don't use H.K. Porter cutters on energized circuits, wire, or cable.

Don't use cutters that are damaged or need parts replaced due to wear.

Don't use cutter products on energized circuits, wire or cables.

Safety Precautions

Indicates a high probability that death, severe bodily injury or major property damage could result.

Hard metals may snap off or fly through the air when cut. Always wear safety glasses and warn workers nearby to prevent injury from flying metal. Take precautions such as wrapping a cloth or rag around the cutting jaws to contain fragments during cutting.

Is serious but less inevitable. There is some probability that death, severe bodily injury or property damage could result.

The "Safety Alert Symbol" symbol to the left is used to call attention to instructions concerning personal safety. Watch for this symbol. It points out important safety precautions. It means: "ATTENTION! Stay alert, personal safety may be in danger!" Read the message that follows this symbol and be alert to the possibility of personal injury or death resulting from misuse.

The use of any industrial tool may present hazards which can result in serious injury or death.

Is less serious but still demands attention. Indicates a hazard which may result in minor injury or property damage.

READ AND UNDERSTAND ALL DIRECTIONS BEFORE OPERATING ANY H.K. PORTER® MANUAL, HYDRAULIC OR PNEUMATIC TOOL

Frequently Asked Questions

1. What is the material to be cut? (See chart below)

2. What size is the material to be cut?

Capacities of all hand-operated cutters are shown opposite each catalog listing. Power tool capacities are shown in the Power Tool Selector chart. Do not exceed listed capacities.

3. How hard is the material to be cut?

Many of the materials illustrated in the chart above are made in varying degrees of hardness. The maxmum hard ness ratings that each hand and power tool is designed to cut are shown under each tool in this catalog.

Extra Hard Metals:

Up to Brinell 455/Rockwell C48

Hard Metals:

Up to Brinell 400/Rockwell C42

Medium Hard Metals:

Up to Brinell 300/Rockwell C31

Soft Metals:

Up to Brinell 200/Rockwell C15

4. Will numerous or few cuts be made in a day?

The frequency of cuts to be made should be taken into consideration when choosing a cutter. HKP manufacturers inexpensive hand cutters for light-duty work, heavy-duty cutters for tougher jobs, and hydraulic and pneumatic cutters for extremely hard materials and production cutting.

5. Is speed a factor in the cutting?

Choose the proper cutter to fit the job requirements, whether an occasional cut is called for or fast, continuous, industrial production cutting.

Still not sure?

Send material samples to:

Cooper Hand Tools - Sumter Plant

Industrial Park

Sumter, SC 29154

Attn: HKP Test Material

NOTE: PROVIDE ANSWERS TO AS MANY OF THE QUESTIONS AS POSSIBLE.

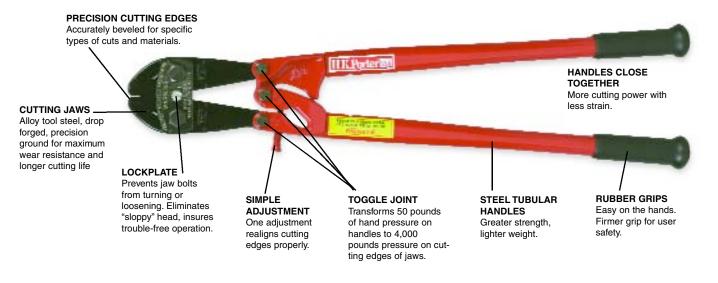

WARNING

- Always wear safety glasses/goggles when cutting.
- Cut in a safe area. Consider the safety of others.
- The harder the material being cut, the greater it is to become airborn during cutting.
- Use tools correctly! (Refer to "Engineering Information" section of this catalog)
- · Use the correct tool for the work being performed.
- Maintain tools, power supplies, and hoses in safe working condition.

Quality Features of H.K. Porter® Cutters

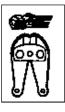

Jaw Designs

There are four basic jaw designs. They are engineered to give long, trouble-free life and the most efficient cutting of the materials which they are designed to cut.

ANGULAR JAWS 30° offset jaws have clipper-cut blades, designed for cutting close or flush to a surface. Cuts soft or medium-hard material

ALL-PURPOSE JAWS Can have center-

or clipper-cut blades used for broad cutting applications.

SHORT-NOSED **JAWS**

Center-cut, carbide-tipped blades for cutting hard- and nonalloy chains and padlock hasps.

HEAVY-DUTY STRAP JAWS

Straps keep the cutting edges aligned under the most demanding applications.

Cutting Blades

Four different cutting blade styles are available for specific types or broad ranges of cutting applications.

CENTER-CUT BLADES

Slightly rounded cutting edges. beveled on both sides, broaden cutting applications.

CLIPPER-CUT BLADES

Blades are beveled on only one side for smooth flush cuts that are close to workpiece.

SHEAR-CUT **BLADES**

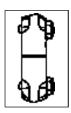

Designed to cut coarse- or finestrand cable with minimal strand distortion.

END-CUT BLADES

Blades are at right angles to handles for easier handling and "head-on" close cutting of materials.

Industrial Grade, Center Cut Cutters

- · General plant maintenance tool
- Drop-forged, precision ground, alloy tool steel jaws with center-cut blades
- · Cuts soft, medium, or hard materials
- Maximum hardness of material to be cut: Brinell 455/Rockwell C48
- · Lockplate keeps jaws from loosening
- Toggle joints turn 50 lbs. hand pressure to 4000 lbs. cutting pressure
- Screw-type adjustment realigns edges
- · Steel handles with rubber grips

Nut Splitter

Splits Nuts up to 3/4", RC15

- · Removes rusted or frozen nuts
- · Center-cut blades
- Blades swivel 360° for ease in splitting hard to reach nuts
- Black-oxide, rust-resistant finish
- Plastisol-coated handle
- Place blades across nut at 90° angles, turn power screw with impact or hand wrench to split nuts
- Doesn't injure bolt or thread, splits both sides of nut at once

Workhead, Hose and Power Supply Selection

Power Tools and Portable Power Supplies

The most important factor in selecting the right hydraulic cutter for the job is identification of the material to be cut. Consider size, hardness (tensile strength) and type of material. Find material at top of chart on previous pages that is closest to the material to be cut. The correct cutter workhead will be found in the left-hand column under "Catalog Number."

All HKP workheads use only one hose to connect the workhead to the hydraulic pump. Standard hose can be ordered with a control wire for remote control, electric hydraulic pumps. Hoses without control wires are for use with hand, air/hydraulic or gasoline driven pumps.

Selecting the proper hydraulic pump depends on speed required and power source available. Cutting cycle times in table show pump best suited to your requirements. Pumps are available in hand-operated, air, electric or gasoline-driven models.

Power Tool Workheads

A workhead, sold as a unit, consists of the cutterhead, cylinder and control handle. Cutterheads and control handles are also available separately. In addition, the cutterhead and cylinder are sold as a unit for use with an HKP hand pump or air/hydraulic pump. And, in most cases, the cutterhead, cylinder, connecting hose and hand pump are also sold as a complete unit.

WORKHEAD

(For use with any HKP motor-driven hydraulic pump.) CUTTERHEAD, CYLINDER AND CONTROL HANDLE. Purchase as unit.

HAND-OPERATED HYDRAULIC CUTTER SYSTEM

HAND PUMP, HOSE, CYLINDER AND CUTTERHEAD. Purchase as unit.

AUTOMATIC SYSTEM -PORTABLE POWER PACK

(electric/hydraulic pump), HOSE WITH CONTROL CABLE, AND WORKHEAD. Purchase components separately.

CUTTERHEAD

Safety Precautions

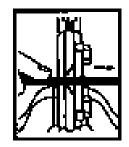

Hard metals may snap off or fly through the air when cut. Always wear safety glasses and warn others nearby to prevent injury from flying metal. To prevent injury from flying metal, take precautions such as wrapping a cloth or rag around the cutting jaws.

	A WARNING	AVERTISSEMENT	ADVERTENCIA
0	Risk Of Eye Injury	Risque de dommages d'oeil	Riesgo de lesión del ojo
	Wear ANSI Approved	Protection d'oeil approuvée	Protección de ojo aprobada
	Eye Protection	de l'usage A.N.S.I.	del desgaste ANSI

How to Sharpen Cutter Jaws

- · Remove nicks in jaws by filing straight across cutting edges
- On jaws with equal bevels, file equally from each bevel, keep file flat against bevel
- On jaws with one large bevel, file on that bevel. Small bevel must also be restored
- · Jaws should not be razor sharp
- Approximately 1/64" (.4mm) should remain flat to form strong, durable edge
- To sharpen shear-cut blades (blades that pass each other like scissors) remove nicks by filing straight across cutting edges
- Finish by running a flat file over inner jaw surface to remove burrs
- · Adjust tool according to the instructions below

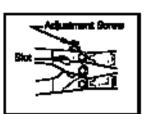

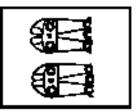

How to Adjust Cutter Jaws

- An adjustment screw is located on the cutter handle above the toggle joints
- If jaw edges are too far apart with handles closed, tighten adjusting screw, this brings cutting edges together
- Cutting edges should be 1/64" (.4mm) apart for longest jaw life
- · Oil all joints and keep free of debris
- If jaw edges are too close together with the handles apart, loosen adjusting screw until it disappears from the narrow slot in the handle
- Make a cut with the tool in this position (cut will force the slot inward)

- Try to close the handles. If they do not close completely and jaw edges are 1/64" (.4mm) apart, tighten adjusting screw to meet the handle on far side of slot
- · Oil all joints and keep free of debris
- If jaws are too far apart with handles closed after making cut with adjusting screw backed off, tighten adjusting screw as explained above
- To sharpen shear-cut blades (blades that operate, like scissors), remove nicks by filing straight across the cutting edges
- Finish by running a flat file over inner blade surface to remove burrs.

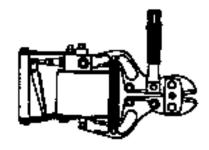

Nicholson® File Recommendations

For Jaw Type	Use File Type
Straight	6", 8" or 10" Mill Bastard
Curved	8", 10" or 12" Half Round Bastard
Straight w/Notch	8", 10" Mill Bastard with one round edge
Notched	8" or 10" Round Bastard

- Choose file size according to size of jaw and/or radius of curve
- · Half round files are the most versatile

Pneumatic Tools

- All HKP air-powered tools require ram lateral input supply of 80-120 psi (6-8 kg/cm²)
- 9190 Series: 6.9 CFM or 8 CFM with factor of safety
- 9290 Series: 16.2 CFM or 18.7 CFM with factor of safety

Ordering Replacement Parts

Order replacement parts through your Cooper Hand Tools Distributor. Care should be taken to give accurate information regarding part numbers and descriptions. Include product model numbers and serial numbers as well. Although all parts are available at the factory, some may be available in a parts kit format only. It is recommended customers stock spare blades, seals, filters and oil to minimize delay in maintaining units.

Operating Hydraulic Pumps Below -25°F (-31°C)

All HKP pumps are supplied with a high quality hydraulic oil. Pour point -25°F (-31°C) 150/165 viscosity SSU @ 100°F (38°C). When operating below -25°F, contact Cooper Tools Customer Service for oil recommendation. Before initial operation, please inspect product to identify any potential damage, or oil leakage, caused during shipment.

Factory Repair Service

HKP units may be returned to factory for repair and reconditioning at any time. A free inspection and estimate of repair charges will be supplied if requested. All returns must be made by prepaid transportation and contact information such as name, address and daytime phone number supplied. Failure to supply this information may result in product repair delay.

Installation Recommendations

IMPORTANT: Electrical connections on cutterhead and hydraulic hose are for low voltage control only. DO NOT PLUG CONTROL HANDLE INTO MAIN POWER SUPPLY. The switches and wiring are designed for relay control only.

HE2200 series single phase Power Pack units are factory wired to run in counterclockwise direction and can be plugged into any outlet with proper power supply. Three phase units must be wired into customer's system. Be sure to wire so unit runs counterclockwise.

HKE102A, HKE302A, HKE402A, HKE602B and T5102 Hydraulic Power Sources are supplied in three phase only and can be wired to operate in either direction.

Try to install units so that hoses and wiring are not accessible to damage by fork lifts or other handling equipment.

When installing pumping unit overhead, be sure to have both cutterhead and hoses well below the pump. Do not loop hoses overhead as air pockets will result in slow reaction. Speed of cut should be approximately that indicated on the POWER TOOL SELECTOR CHART. If unit is cutting slower than indicated, DO NOT ADJUST RELIEF VALVE. THE PRESSURE SETTING WILL NOT AFFECT THE SPEED.

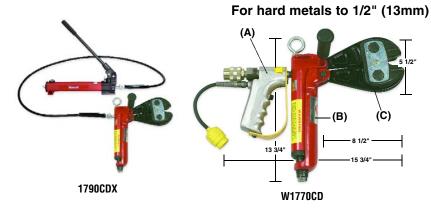

We recommend checking all connections for leaks, check for voltage drop or contact Customer Service for assistance.

Power Tool Hoses & Accessories

- All HKP hydraulic hoses are made from oil-and abrasion-resistant materials
- Hose style also offered in 1/4" or 3/8" sizes
- · Hoses are 2-ply rated, reinforced with two braids of high tensile steel wire and covered with oil and weather resistant rubber
- MSHA approved, 2-wire steel braid with 3/8" (10mm) 18 NPTF fittings
- Only order enough hose to fit your particular application. Using too much hose, slows operator and production
- · All control wire hoses come complete with 3-wire, twist-lock connectors for low-voltage control only
- · Couplings not included with hoses

Hydraulic Rod and Bar Cutter

- · Excellent for semi-production cutting
- · Lightweight cutter
- · Center-cut blades
- Cuts No. 4 rebar, soft, medium, and hard materials
- Maximum hardness of material to be cut: Brinell 455/Rockwell C48
- · Lockplate keeps jaws from loosening

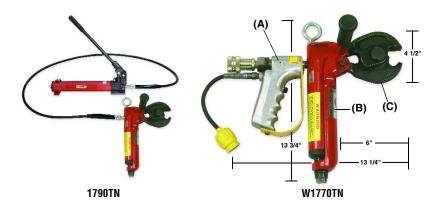

Cat No.	UPC No.	Approx. Ibs	Weight k	Description
W1770CD	037103904287	22	10	Workhead Assembly (illustrated). Includes (A) control handle (W10824), (B) cylinder assembly (1752), (C) cutterhead (1713CDX). Can be used with any HKP electric/hydraulic pump.

1780CDX	037103914712	19	9	Cylinder and cutterhead assembly only. Includes (B) cylinder assembly (1752), (C) cutterhead (1713CDX) only. For use with any HKP hand pump or air/hydraulic pump.
1713CDX	037103914231	8	4	Replacement cutterhead only. (C)

Hydraulic Wire Rope Cutter

For wire and cable to 3/4" (19mm)

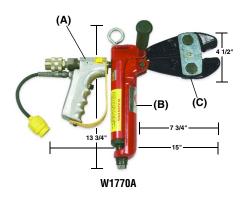

- Makes clean, even cuts with no distortion
- Notched blade holds wire rope or cable securely
- Cuts hard or soft wire rope and cable
- Not recommended for copper or aluminum power cable

Cat No.	UPC No.	Approx. Ibs	Weight k	Description
W1770TN	037103904379	18	8	Workhead Assembly (illustrated). Includes (A) control handle (W10824), (B) cylinder assembly (1752), (C) cutterhead (1713TN). Can be used with any HKP electric/hydraulic pump.
1790TN	037103914903	34	16	Hand-operated Hydraulic Cutter System. Includes (D) hand pump (HKH02), (C) cutterhead (1713TN), (B) cylinder assembly (1752), and (E) 7' (2134mm) hydraulic hose (BU1405).
1780TN	037103914774	15	7	Cylinder and cutterhead assembly only. Includes (B) cylinder assembly (1752), (C) cutterhead (1713TN) only. For use with any HKP hand pump or air/hydraulic pump.
1713TN	037103914347	4	2	Replacement cutterhead only. (C)

Hydraulic, Angular Rod and Bar Cutter

For soft metals to 9/16" (14mm), medium metals to 1/2" (13mm)

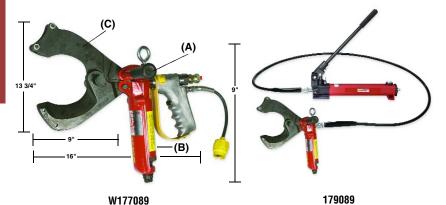

- Makes flush cuts in confined spaces
- Angular jaws with clipper-cut blades
- Cuts soft or medium material
- · Lockplate keeps jaws from loosening
- Do NOT cut hard material
- Angle of cutterhead keeps tool and users hands clear of work surface

Cat No.	UPC No.	Approx. \ Ibs	Weight k	Description
W1770A	037103904263	18	8	Workhead Assembly (illustrated). Includes (A) control handle (W10824), (B) cylinder assembly (1752), (C) cutterhead (1713A). Can be used with any HKP electric/hydraulic pump.
1780A	037103914699	15	7	Cylinder and cutterhead assembly only. Includes (B) cylinder assembly (1752), (C) cutterhead (1713A) only. For use with any HKP hand pump or air/hydraulic pump.
1713A	037103914217	4	2	Replacement cutterhead only. (C)

Hydraulic Cable Cutter

For soft copper or aluminum cable to 3" (76mm)

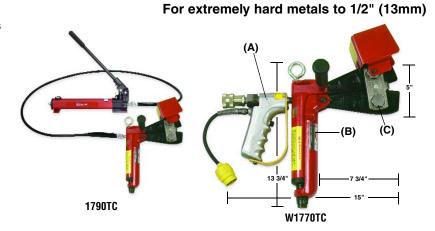

- Shear-cut blades
- Cuts soft copper or aluminum cable and lead- or rubber-covered power and communications cable
- Do NOT cut ACSR or steel cable

Cat No.	UPC No.	Approx. Ibs	Weight k	Description
W177089	037103904386	18 1/2	9	Workhead Assembly (illustrated). Includes (A) control handle (W10824), (B) cylinder assembly (1753), (C) cutterhead (8913CN). Can be used with any HKP electric/hydraulic pump.

178089	037103914781	15 1/2	7	Cylinder and cutterhead assembly only. Includes (B) cylinder assembly (1753), (C) cutterhead (8913CN) only. For use with any HKP hand pump or air/hydraulic pump.
8913CN	037103914745	4 1/2	2	Replacement cutterhead only. (C)

Hydraulic Cutter with Carbide jaw Edges

- Recommended for special cutting applications where maximum hardness of material to be cut exceeds Brinell 400/Rockwell C42
- Carbide-tipped blades
- Cuts hard-alloy and case-hardened chain and extremely hard material
- · Cuts one side of link at a time
- · Lockplate keeps jaws from loosening

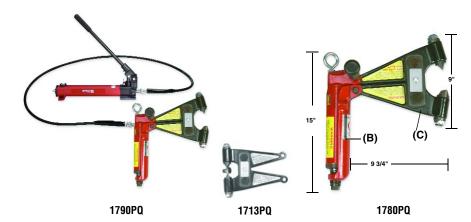

Cat No.	UPC No.	Approx.	Weight k	Description
W1770TC	037103904355	22	10	Workhead Assembly (illustrated). Includes (A) control handle (W10824), (B) cylinder assembly (1752), (C) cutterhead with guard (1713TC). Can be used with any HKP electric/hydraulic pump.
1790TC	037103914880	38 1/2	18	Hand-operated Hydraulic Cutter System. Includes (D) hand pump (HKH02), (C) cutterhead (1713TC), (B) cylinder assembly (1752), and (E) 7' (2134mm) hydraulic hose (BU1405).
1780TC	037103914750	19	9	Cylinder and cutterhead assembly only. Includes (B) cylinder assembly (1752), (C) cutterhead (1713TC) only. For use with any HKP hand pump or air/hydraulic pump.
1713TC	037103914323	8	4	Replacement cutterhead only. (C)

Hydraulic Soft Nut Splitter (48mm)

For nuts up to 1 7/8" (Rockwell C15)

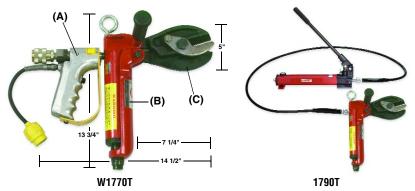

- Center-cut blades swivel 360° to allow cutting in confined spaces
- Cuts soft nuts, Rockwell C15
- Do NOT cut hard nuts

Cat No.	UPC No.	Approx. Ibs	Weight k	Description
1790PQ	037103914859	49	22	Hand-operated Hydraulic Cutter System (illustrated). Includes (D) hand pump (HKH02), (C) cutterhead (1713PQ), (B) cylinder assembly (1753), and (E) 7' (2134mm) hydraulic hose (BU1405).
1780PQ	037103914729	29	13	Cylinder and cutterhead assembly only (illustrated). Includes (B) cylinder assembly (1753), (C) cutterhead (1713PQ) only. For use with any HKP hand pump or air/hydraulic pump.
1713PQ	037103914286	18	8	Replacement cutterhead only. (illustrated) (C)

Hydraulic Strip Shear Cutter

For flat steel strap 1/4" (6mm) x 1 1/2" (38mm)

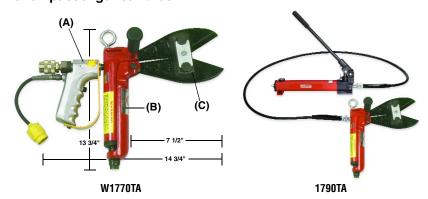

- Recommended for fast, production cutting of steel strapping
- · Shear-cut blades
- · Cuts flat steel strap

Cat No.	UPC No.	Approx. Ibs	Weight k	Description

1780TG	037103914767	15	7	Cylinder and cutterhead assembly only. Includes (B) cylinder assembly (1752), (C) cutterhead (1713TG) only. For use with any HKP hand pump or air/hydraulic pump.
1713TG	037103914330	4	2	Replacement cutterhead only. (C)

Hydraulic Rod and Bar Cutters

- Compact, rugged, portable cutter
- Easily replaceable or redressable blades
- Cuts rods and bars
- Includes control handle
- · Includes filter and air breather
- 1-hose operation

- Engineered for demanding production cutting such as steel mill applications
- Heavy-duty, large-capacity, portable, durable cutter
- · Cuts chain and reinforcing rod
- Includes control handle

 workhead (standard); (B) double outlet with 4-way
 manual valve at pump for 2 workheads or double-acting
 cylinder; (C) double outlet with solenoid valving for
 remote control of 2 workheads or double-acting cylinder
- Internal filter protects system from contamination of hydraulic oil
- · Low voltage (24 VAC) control circuitry for operator safety
- · Other voltages available
- Contact Customer Service before ordering

HE2201B

HE2201C

Cat No.	UPC No.	Approx. lbs	Weight k	Description	HP	V	HZ
HE2201A	037103900838	86	39	Power Pack Only - operation of one workhead	3/4	115	60
HE2201B	037103900845	86	39	Power Pack Only - operation of two workheads or double acting cylinder - four way manual valve	3/4	115	60
HE2201C	037103900852	93	42	Power Pack Only - operation of two workheads or double acting cylinder - solenoid valving	3/4	115	60

Electric Pump

1 1/2 HP

- Powerful industrial duty pump ideal for cutting applications where load holding is not required
- Pump is normally used with single-acting cylinders and the motor is on only during the cutting cycle. When the motor is shut off, all pressure is dumped to the tank
- Fully enclosed fan-cooled motors can be used in all indoor/outdoor environments
- Two speed pump design 1st stage flow of 3GPM to 800 PSI shortens work cycles
- Pressure levels set for safe use with all H.K. Porter[®] cutting tools
- Contact Customer Service before ordering

Cutterhead and hose pictured must be ordered separately.

Stationary Hydraulic Power Pack

T - Series, 5 HP

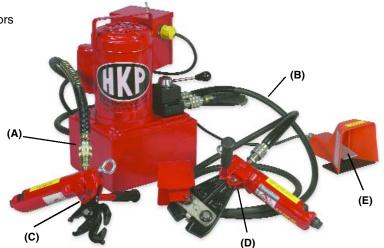

- T Series, 5 HP
- · Production pump will operate any HKP workhead at maximum speeds
- Electrically-driven, 220-V, 60Hz, 3-phase TEFC motor or 460-V, 60Hz, 3-phase TEFC motor
- Low voltage control circuit (24 VAC) provides safe, push-button, remote control of workhead
- · Electric components are protected from dust and water in a JIC box
- Single or double outlets for 1 or 2 workheads
- · Other voltages available
- T-Series pumps are made to order.
- · Contact Customer Service for availability.

Tire Chain Repair Tools

Hydraulic Chain Repair System

- System WTC200A
- Ideal for fast truck chain maintenance by fleet operators
- Opens, closes, and cuts up to 1/2" alloy chain, case-hardened chain, and padlock hasps
- Mounts on platform or mobile cart
- 1780TC, and 1780LK workheads will work with other HKP pumps
- Other HKP pumps will work with tire chain repair tools
- Note: Call Customer Service for assistance before ordering

Cat No.	UPC No.	Approx. Ibs	Weight k	Description
WTC200A	037103106759	136	62	Hydraulic Chain Repair System – For Alloy Chain Only. Includes (A) Portable, 3/4 HP Hydraulic Power Pack (HE2201B) with 4-way manual valve, (B) two 7' hydraulic hoses (BU1405), (C) chain workhead (1780LK), (D) chain cutter workhead (1780TC, carbide inserts), (E) foot switch control (W32368).

Hydraulic Cutting Efficiency

The following formula shows the unique efficiency of hydraulic cutters:

- Hydraulic Pump Pressure (A) x Area of Workhead Cylinder
 (B) = Force Output of System (C)
- Using HKP equipment (page 312): HE2200 Power Pack (A) Output is 7000 psi (490 kg/cm²) x Area of W75000 Cylinder
 - (B) 4.9in.² (31.6 cm²) = Total Thrust of System at (C) of 17 tons (15.5 metric tons)
- Hydraulic cutting units are supplied with parts listings and repair information
- Additional copies of these forms can be obtained by contacting customer service
- Be sure to include unit part number, if available, and serial number
- All HKP hydraulic tools are designed to require minimum maintenance
- Preventive Maintenance Scheduling should be standard for such items as filters, oil for hydraulic pumps, and cutting blades in hydraulic cutterheads.

Hydraulic Hose and Control Wire

For Remote Control

- Use hose and control wire for remote control
- 3-wire, twist-lock connectors
- · Low voltage control, only
- Couplings not included
- Excess hose will slow operation, lack of hose will limit mobility
- Order hose to fit specific applications
- Features hose guard to prevent kinking
- · Special hoses available on request
- Hose ID is 3/8"

Cat	UPC	Hose Length		Hose Inside Diameter	Shelf
No.	No.	Feet	m	Inch mm	Pack
W119681	037103904201	10	3	3/8 10	1
W119581	037103904133	20	6.1	3/8 10	1
W119587	037103904195	50	15.2	3/8 10	1

Hydraulic Hose

For HKH02 or HKA01 Pumps

- Couplings not included
- Excess hose will slow operation, lack of hose will limit mobility
- · Order hose to fit specific applications
- · Features hose guard to prevent kinking
- Special hoses available on request
- Hose ID is 3/8"
- To be used with HKH02 or HKA01 pumps

Cat	UPC	Hose Length	Γ	Hose Inside Diameter	Shelf

BU1405	037103900722	7	2	3/8 10	1

Hydraulic Hose Couplers

BU1606 HOSE HALF

BU1604 COMPLETE

BU1605 Workhead Half

- · Quick detach couplers
- Use with hand-hydraulic pump (HKH02) or air/hydraulic pump (HKA01)
- 3/8" 18 NPTF
- · Shortens workhead switching time

Cat No.	UPC No.	Description	Shelf Pack
BU1606	037103900777	Hose Half	1
BU1604	037103900753	Complete Coupler, Contains BU1605, BU1606	1
BU1605	037103900760	Workhead Half	1

Hydraulic Hose Couplers

Swivel Disconnect

- · Heavy-duty, swivel disconnect couplers
- · Use with all HKP workheads
- Designed for comfortable, efficient positioning of workheads
- 3/8" 18 NPTF

23638 Workhead Half

23628 HOSE HALF

Cat No.	UPC No.	Description	Shelf Pack
20868	037103915085	Complete	1
23638	037103915665	Workhead Half	1
23628	037103915658	Hose Half	1

Control Handles

- Standard on all units except as noted
- 1-handed control with guard and fingertip button

- "Parallel" or "in-line" design
- 2-handed control requires operator to push 2 control buttons to operate workhead
- Keeps hands out of cutting area
- Handlebar design
- 2-handed control requires operator to push 2 control buttons to operate workhead
- · Keeps hands out of cutting area
- Standard product designed for 1700 Series cylinders

Optional Controls

W32368

W37048

W32368 - Heavy Duty Electric Foot Switch

- Heavy guard prevents accidental activation of workhead
- Includes 10' (3084mm) of control cord

W37048 - Electric Solenoid-Operated Air Valve

• For extra fast operation of air actuated tools

34468 - Heavy Duty Air Foot Switch

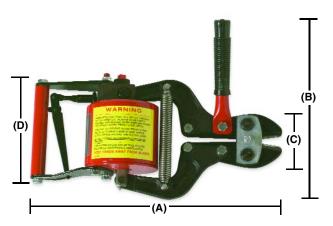

• For use with 9190 or 9290 series rod cutters and 27842 cable cutter

		Approx.	Weight

Pneumatic Cutters

Rod Cutter Workhead

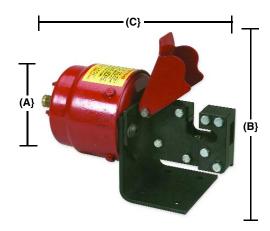

- Heavy-duty model for 90-130 psi or lightweight model for 80-120 psi
- Used in the wire-shelving industry
- No exhaust shock
- 4 cutterheads available for a wide range of production needs: center-cut, clipper-cut, angular jaws, and end-cut
- Cuts soft, medium, or hard materials (refer to chart on pages 300 301)
- Heavy-duty workhead (9290 series) has 5" bore (127mm) and 3" stroke (76mm)
- Light duty workhead (9190 series) has 4" bore (102mm) and 2" stroke (51mm)
- · Cutting controlled by manual pressure
- Filter-lubricator units recommended in air supply line for long tool service

Cable Cutter

- Extremely fast cutter
- Cuts copper or aluminum cable
- Operates on 80-100 psi (6-7 kg/cm2)
- 2 control valves available: 34468, air/foot switch, or W37048, solenoid-operated (electric) foot switch
- Specify control valve when ordering
- Made to order. Check with Customer Service for lead time
