Linear Alignment Coupler
Eliminate alignment problems. Install a Linear Alignment coupler.

Features...

- Reduces rod seal and bearing wear
- Prevents binding and erratic movement caused by misalignment
- Permits a greater tolerance between cylinder centerline and mating member
- Works equally well in “push” or “pull” applications

1. All dimensions are subject to change by manufacturer
2. Larger sizes and special designs available. Consult factory.
3. Use jam nut to lock coupler to rod when used with full diameter threads.
4. Use “max. rated load” for 4:1 safety factor.
