A WIDE RANGE OF UNDERWATER TOOL SOLUTIONS
SINKER DRILL Model SK58

The STANLEY SK58 Sinker Drill is a heavy duty rock drill designed for drilling underwater in concrete, rock and masonry. The feathering on/off valve makes starting the drill bit easy. The SK58 uses industry standard drill steels and can drill up to a 3” (75 mm) diameter hole up to 20’ (6 m) deep. The direct drive rotation motor drives the 1” x 4¼” hex shank drill steel and is adjustable between 0 and 300 rpm. Air is required to clear holes of debris. Painted hi-visibility yellow.

When hydraulic hose exceeds 100’ (30.4 m) in length, increase I.D. of both pressure and return hose. For more information, consult STANLEY Infrastructure.

UNDERWATER TOOLS

HAMMER DRILL Model HD45

The feathering on/off valve and adjustable rotation speed allows easy drill bit start-up and precise control. The high torque rotation motor drives standard 736 Skil hex carbide tipped drill bits and is capable of drilling a 2” diameter hole up to 29” deep. Fluted drill bits require no water or air to clear holes. Ideal for drilling holes for setting anchor bolts. Painted hi-visibility yellow.

The STANLEY ID07 Impact Drill is two hydraulic underwater tools in one - an impact wrench and a wood drill. The ." square drive impact wrench delivers torque up to 500 ft lbs and can tighten or loosen nuts and bolts and drive lag screws. Use the ID07 with the 05079 adapter and wood boring bits to drill up to 11/16" diameter holes into timber with no reactive torque to the diver. Trigger guard and hi-visibility yellow paint is standard.

**Features**
- Integral STANLEY Hyrez gear motor strikes a perfect balance of high power and low weight
- Stainless Steel spools and fasteners
- Forward-Reverse with variable speed
- 500 ft lbs/675 Nm of impact torque
- Oversized trigger with guard for operator comfort
- Wiper seals on reversing and trigger spool
- Built in reverse check valve ensures long seal life
- Plastisol coated handle for comfortable ergonomic grip
- Forward position of handle provides better balance
- Open Center/Closed Center-Dual Spool feature
- Cast-in lifting eye

Wood Boring Bits have 7/16" Quick Change, Hex Shank Requires Part # 05079 Adaptor for use with ID07 U/W Impact Drill.
The STANLEY DL07 hydraulic drill is a forward/reverse, variable speed drill with a ½” keyed chuck for underwater drilling applications. The DL07 has more than enough torque to drill most steel, masonry, wood or coral. A two position assist handle and trigger guard are standard. See chart below for speeds at select gpm of hydraulic flow. Painted hi-visibility yellow.

**Features**
- Integral STANLEY Hyrevz gear motor produces high torque at any drilling speed
- Stainless Steel spools and fasteners
- Forward-Reverse with variable speed
- Dual position assist handle provides increased control
- Oversized trigger with guard for operator comfort
- Wiper seals on reversing and trigger spool
- Built in reverse check valve ensures long seal life
- Plastisol handle for comfortable ergonomic grip
- Forward position of handle provides better balance
- Open Center/Closed Center-Dual Spool Feature
- Cast-in lifting eye

*whips and couplers not included*
The STANLEY IW Series of tools are medium to extreme duty square drive impact wrenches designed for some of the toughest underwater bolting applications. Powered by a integral STANLEY Hyrevz motor, our impact wrenches have an impact intensity ranging from 250 ft lbs of torque to 3,500 ft lbs of torque. Designed to run from a wide range of hydraulic circuits, this wrench allows underwater bolting in the most extreme applications. Hi-visibility yellow paint is standard.

### Features
- Integral STANLEY Hyrevz gear motor produces high torque
- Stainless Steel spools and fasteners
- Forward-Reverse with variable speed
- "D" style grip handle with inside trigger
- Feathering on/off trigger for precise control
- Adjustable impact intensity
- Durable swing hammer mechanism
- Cast-in lifting eye
- Pistol grip style handle dipped in Plastisol for comfortable ergonomic grip available on IW12

CUT-OFF SAW Model CO23

The CO23 Cut-Off Saw is a hydraulic powered saw for dimensional cutting of metal, concrete, rock, masonry and coral. It has a high torque gear motor and 10” blade capacity for abrasive and diamond wheels with a 1” arbor. The CO23 is designed for underwater operation and is painted hi-visibility yellow.

Features
- Integral STANLEY Hyrevz gear motor produces high torque
- Direct drive motor
- Stainless Steel spool and fasteners
- Adjustable shoe for precise cuts
- Interlocking safety trigger
- Cast aluminum handle and guard for durability
- Counter-clockwise rotation
- Wide flow range

GRINDER Model GR29

The STANLEY Hydraulic GR29 Grinder is a right angle grinder that can be used for grinding and cleaning in underwater applications with a variety of wheels, brushes and attachments. The high torque gear motor drives a standard 5/8 - 11 threaded spindle. A 9” adjustable wheel guard, two position assist handle and trigger guard are standard. Painted hi-visibility yellow.

Features
- Integral STANLEY Hyrevz gear motor produces high torque
- Stainless Steel spools and fasteners
- Two position assist handle for right/left hand operation
- Oversized trigger with guard for diver comfort
- Adjustable wheel guard for infinite positions
- Plastisol covered handle for comfortable ergonomic grip
- Use with grinding wheels, hull scrubbing brushes, wire and nylon brushes, barnacle busters and Desmond wheels
- 3200 rpm @ 12 gpm
- Cast-in lifting eye

The ergonomic "D" handle with protected trigger prevents accidental operation of the tool. The handle is Plastisol coated for diver comfort. The CH18 has a slide latch style tool bit retainer that will accept .580 hex shank, round collar tool bits. Painted hi-visibility yellow.

**Features**
- Ergonomic "D" handle with protected trigger
- Stainless Steel spool and fasteners
- Handle is Plastisol coated for diver comfort
- Uses standard .580 hex shank, round collar tool bits
- High power to weight ratio
- Operates in any position

STANLEY underwater saws are built to withstand the most demanding underwater conditions. The DS11 Diamond Chain Saw is specifically designed to cut solid concrete underwater with the ability to plunge cut sea walls up to 18 inches thick. It comes in two available bar lengths (15” and 18”) and two different chains depending on the amount of rebar and hardness of concrete. The CS06 and CS11 are both designed to cut wood structures underwater such as bridge pilings, pier, and dock timbers. Both feature the STANLEY Hyrevz motor for increased durability and power. The power to weight ratio of all chainsaws is significantly higher than any other comparable chainsaw.

**Features**
- Direct drive motor - no chain coast when trigger is released
- Integral STANLEY Hyrevz gear motor for durability and power
- Stainless Steel spool and fasteners
- Interlocking safety trigger and hand guard
- Order bar and chain separately – See Chart for Selection

UNDERWATER TOOLS

TRASH PUMPS & SUMP PUMPS

With a range of 450 to 800 GPM of output flow the trash pumps offered by STANLEY Infrastructure are capable of moving high volumes of water, sand slurries, gravel, mud, and solids up to 4 inches in diameter. The SM50 Submersible Pump is a self-priming hydraulic dewatering pump with 3 inch NPFT discharge and a discharge flow of 500 gpm. The cast stainless steel semi-closed impeller resist corrosion and the cast aluminum housing fits the need for high volume and high head pump applications. Can draw water down to 3 ½ ".

STANLEY Infrastructure offers small to large size underwater hand held breakers with a weight class ranging from 50 lbs to 90 lbs. The BR87 is the hardest hitting underwater breaker we offer and can be used for rock breaking, coral removal, and rod and anchor driving. The feathering on/off valve on all of our breakers controls the speed and allows for easier initial tool placement. Standard 1 1/8” x 6” hex chuck and latch retainer. Painted hi-visibility yellow.
